# Prem Bahadur Chand

Frontend Web Developer | Graphic Designer | Online Marketer |  
Translator  
Hamburg Area, Germany

## Summary

### Web Development:

The website takes a long time to build. There are a lot of things that have to happen before it can go live. Good things take time to create and any good designer or developer is going to take their time so they deliver you something that both them and you can be proud of.

I enjoy taking complex problems and turning them into simple and beautiful interface designs. I also love the logic and structure of coding and always strive to write elegant and efficient code. Whether it be HTML, CSS, or JS.

### Translation:

The translation is sometimes defined as the process of capturing ideas expressed in one language and then transplanting them into the minds of persons who use another language. Meaningful translation paves the way for meaningful application. Good Translation Does Not "Just Happen"--It Requires Hard Work. It requires time and effort.

---
